OBJECTIVE

History of Medicine teaching, both at pre and post graduate level. Professor has strong paper writing and research skills, experience in lectures, giving guided tours, offering educational seminars and organizing other related activities. As an essential link in the education of future physicians, History of medicine has always honored his distinct pedagogical role in introducing future health scientists to the historical development of the science they will serve, an essential element for the knowledge of contemporary medicine, simultaneously teaching them moral rules and ethics for the exercise of daily clinical practice.
