## RESEARCH

---

Research interests focused around statistical and epidemiological principles and methods for designing, analysing and reporting clinical and epidemiological studies in acute care hospitals and other healthcare settings. Record of published research comprises mainly collaborative applied and translational research, including prognostic factor studies, clinical prediction models, quasi-experimental and time series studies for intervention evaluations, population-based cohort studies, complex sample surveys, systematic reviews and meta-analyses, with long-term research focus on healthcare-associated infections, multi-drug resistant pathogens and antimicrobial drugs.

### Bibliometric indices of published research works:

- Times cited > 2100; h-index = 25; i10-index = 36 (Google Scholar, since 2007).
- 88% (57/65) first (n = 12), second (n = 26) or last (n = 19) authored publications.
- Impact factor (Clarivate, 2022): Cumulative = 379, Avg. = 6.4 (n = 59 papers).
- Journal cite score (Scopus, 2022): Cumulative = 587, Avg. = 9.8 (n = 60 papers).
- 15 papers in the top 25% most cited documents worldwide in Scopus since 2016.
- 75% of papers published in 1<sup>st</sup> quartile (Q1, n=36) or 2<sup>nd</sup> quartile (Q2, n=13) ranked journals (WoS).
- 46 (71%) primary research studies, 12 (19%) systematic reviews & meta-analyses, 7 (11%) narrative reviews, editorials, tutorials and commentaries.
